

Gauri — SAP, Salesforce & Data Engineering/Analytics Addendum

Technology supplement focused on unique/current website capabilities and metrics, while avoiding wholesale duplication of the existing ZIP technology PDFs.

Corpus rule: This file is an **addendum** to the user's existing 12-file ZIP. It is designed to add information not already represented there, or to add authoritative/current versions of facts that supersede illustrative records. Public facts, user-supplied policy facts, and illustrative fallback material are explicitly labelled.

A. SAP product catalogue — current website

SAP-001 | SAP S/4HANA Cloud ERP

Fact: Gauri presents S/4HANA Cloud ERP as an intelligent, integrated enterprise platform for digital transformation.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-002 | SAP Business One

Fact: Gauri presents Business One as an integrated platform covering finance, accounting, purchasing, sales, CRM, inventory and project management.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-003 | SAP BTP

Fact: SAP Business Technology Platform is positioned as the digital foundation for integration, AI-driven insights and scalable application development.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-004 | SAP Sales Cloud V2

Fact: Modern intelligent selling capability delivered with CRM expertise.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-005 | SAP Service Cloud V2

Fact: Modern connected service experiences delivered with CRM expertise.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-006 | SAP Emarsys

Fact: Personalised customer/prospect engagement through integrated marketing capabilities; current page describes real-time personalisation, omnichannel automation and AI-driven insights.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-007 | SAP Customer Data Platform

Fact: Connected customer-data capability for meaningful customer experiences.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-008 | SAP Business AI/Joule

Fact: Gauri's public AI-ready proposition includes SAP Business AI; specific Joule functionality should be answered only where current Gauri/SAP source content supports it.

Status: PUBLIC CURRENT / CONTROLLED | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/>

B. SAP services and clean-core

SAP-020 | Implementation

Fact: SAP licensing, implementation, enhancements and managed-service support are part of Gauri's public SAP positioning.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technologies/>

SAP-021 | Managed services

Fact: Gauri offers ongoing SAP support and managed-service capability.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/sap/>

SAP-022 | Engineering / extensions

Fact: Gauri's S/4HANA positioning includes cloud extensibility and clean-core principles.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/whitepaper/unleash-innovation-with-sap-business-technology-platform-sap-btp/>

SAP-023 | Migration

Fact: Public material supports migration planning, data migration, validation, cut-over and hypercare for cloud modernisation.

Status: PUBLIC / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: User-provided 41-page merged Gauri PDF; records explicitly marked illustrative/internal are not treated as verified public facts.

SAP-024 | Integration

Fact: SAP integration includes Salesforce and third-party platforms; current Gauri material recommends business-driven integration, clear system ownership, APIs/event-driven patterns, and real/near-real-time flows.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/service/sap-s-4hana-integration-with-salesforce/>

SAP-025 | Data migration

Fact: Data migration and validation are part of representative S/4HANA/cloud modernisation scope.

Status: PUBLIC / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: User-provided 41-page merged Gauri PDF; records explicitly marked illustrative/internal are not treated as verified public facts.

C. Salesforce current portfolio and metrics

SF-001 | Salesforce Summit Partner

Fact: Gauri currently presents itself as a Salesforce Summit Partner.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-002 | 154+ projects

Fact: Current Salesforce page states 154+ projects completed. This is a time-sensitive public company claim and should be stored with an observation date.

Status: CURRENT PUBLIC CLAIM | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-003 | 44+ certified experts

Fact: Current Salesforce page states 44+ certified experts. Store with observation date because it can change.

Status: CURRENT PUBLIC CLAIM | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-004 | Sales Cloud

Fact: Salesforce Sales Cloud is part of Gauri's portfolio.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-005 | Service Cloud

Fact: Salesforce Service Cloud is part of Gauri's portfolio.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-006 | Field Service

Fact: Salesforce Field Service is a current portfolio capability focused on scheduling, mobile productivity and connected service.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/salesforce-field-service/>

SF-007 | Manufacturing Cloud

Fact: Salesforce Manufacturing Cloud is listed in Gauri's current portfolio.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-008 | Data Cloud

Fact: Salesforce Data Cloud is listed as a current portfolio capability for unified customer data and real-time insights.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-009 | Marketing Cloud

Fact: Gauri has a dedicated current Salesforce Marketing Cloud page covering unified customer data, personalised AI-driven campaigns, omnichannel engagement and analytics.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/salesforce-marketing-cloud/>

SF-010 | Agentforce / Einstein

Fact: Gauri's current AI-ready proposition explicitly includes Salesforce Agentforce and Einstein.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/>

D. Salesforce services and accelerators

SF-020 | Health Check

Fact: Current Gauri Salesforce Health Check material focuses on system performance, data quality, process alignment, security, optimisation and value realisation.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-021 | Implementation

Fact: Current implementation positioning covers business-process alignment, customised configuration, enterprise integrations, adoption/training and post-go-live support.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-022 | Managed Service

Fact: Gauri offers ongoing optimisation, support, enhancements and continuous innovation.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-023 | Business Value Realisation

Fact: Current Salesforce Marketing Cloud/service pages position business value realisation around measurable ROI and sustained growth.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/salesforce-marketing-cloud/>

SF-024 | Resource augmentation

Fact: Salesforce engineering/resource augmentation is a current service listed by Gauri.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

SF-025 | Customer 360 Accelerator

Fact: Gauri's current accelerator portfolio includes Customer 360 Accelerator for a unified customer profile.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/salesforce-accelerators/>

SF-026 | Salesforce-SAP Integration Accelerator

Fact: Current accelerator connects front-end Salesforce customer engagement with SAP back-end processes and synchronises accounts, orders, inventory and financial data.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/salesforce-accelerators/>

SF-027 | Service Reporting Suite Accelerator

Fact: Pre-built dashboards/analytics for service KPIs including case resolution, agent performance and customer satisfaction.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/salesforce-accelerators/>

SF-028 | MuleSoft / integration

Fact: Gauri states Salesforce can integrate with SAP, MuleSoft, Talend/EDI and other enterprise platforms.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/salesforce/>

E. Data engineering — unique retrieval concepts

DE-001 | Governed data foundations

Fact: Gauri's AI-ready proposition requires governed data foundations before AI is layered on top.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/>

DE-002 | Lakehouse

Fact: Gauri's Data & AI positioning uses lakehouse architectures to provide scalable storage plus governed analytical structures.

Status: PUBLIC CURRENT / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/data-and-ai/>

DE-003 | Semantic models

Fact: Semantic models provide a governed business-friendly layer defining metrics consistently across Salesforce, SAP and other source systems.

Status: PUBLIC CURRENT / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/data-and-ai/>

DE-004 | Data quality

Fact: Data quality is a first-class readiness concern; quality rules and governance should precede AI consumption.

Status: PUBLIC CURRENT / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/data-and-ai/>

DE-005 | Data lineage

Fact: Lineage tracking is part of the governed-data approach described in the supplied capability material.

Status: PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: User-provided 41-page merged Gauri PDF; records explicitly marked illustrative/internal are not treated as verified public facts.

DE-006 | Data governance

Fact: Access governance, lineage and trustworthy-data controls support Gauri's governance-first AI positioning.

Status: PUBLIC CURRENT / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/ai-readiness/>

DE-007 | BI / analytics

Fact: Gauri's Data & AI practice includes analytics and business intelligence, with public work referencing ThoughtSpot and self-service analytics.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technology/data-and-ai/>

DE-008 | Predictive analytics

Fact: Gauri's public data positioning extends from descriptive analytics toward predictive use cases such as demand forecasting.

Status: PUBLIC CURRENT / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/resource/data-science-and-artificial-intelligence/>

DE-009 | Salesforce data

Fact: Salesforce is explicitly named as a source feeding Gauri's governed data/lakehouse approach.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/>

DE-010 | SAP data

Fact: SAP is explicitly named as a source feeding Gauri's governed data/lakehouse approach.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/>

DE-011 | Third-party data

Fact: Gauri's data/integration positioning supports connecting third-party systems and data into the enterprise estate.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/technologies/>

DE-012 | Cloud data

Fact: Current AI-readiness material states the assessment/build approach can be delivered across Salesforce, SAP and Azure; cloud data-platform choices should remain client-specific unless a source names a particular platform.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/ai-readiness/>

F. Setu-AI and document intelligence

SETU-001 | Document-to-data

Fact: Setu-AI turns inbound documents from any source into clean, structured data.

Status: PUBLIC CURRENT | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/>

SETU-002 | Enterprise targets

Fact: Setu-AI can be positioned as a document-intelligence layer feeding enterprise platforms; the supplied material specifically describes SAP/Salesforce downstream use.

Status: PUBLIC / PROVIDED SOURCE | **Effective/observed:** 2026-08-13

Source: User-provided 41-page merged Gauri PDF; records explicitly marked illustrative/internal are not treated as verified public facts.

SETU-003 | AI readiness relationship

Fact: Document intelligence is a practical AI use case built on governed enterprise data and platform integration rather than an isolated chatbot.

Status: PUBLIC CURRENT / SYNTHESIS | **Effective/observed:** 2026-08-13

Source: <https://www.gauri.com/ai-readiness/>

G. Production RAG temporal metadata

Store current metrics such as 154+ Salesforce projects and 44+ certified experts with **observed_at=2026-08-13** and `source_url`=the current Salesforce page. Do not overwrite historical values; append new observations.

Store product availability and service claims with source URL + `crawl/observation date`. When a current page changes, preserve the old record as historical rather than deleting it.
