

Service Offerings

GAURI SERVICE OFFERINGS AND ENGAGEMENT MODELS

ENGAGEMENT TYPES AND DELIVERY MODELS

TIME AND MATERIALS ENGAGEMENTS

Model: Consultant hours charged at agreed day rates

Flexibility: Scope flexible, estimated timeline as guide only

Billing: Monthly invoicing based on actual hours consumed

Risk: Client bears cost overrun risk if scope grows

Suitability: Proof-of-concept, exploratory work, undefined scope

Engagement Lead: Delivery lead tracks hours against budget; customer success manages change requests

Payment Terms: Net 30 from invoice date (standard Gauri terms)

FIXED SCOPE, FIXED TIMELINE ENGAGEMENTS

Model: Defined deliverables, fixed timeline, fixed price

Specification: Comprehensive statement of work (SOW) defining scope, deliverables, timeline

Risk Sharing: Gauri bears timeline and scope risk; client bears change-order risk

Billing: Milestone-based billing (e.g., 25% at kick-off, 25% at design approval, 25% at testing, 25% at go-live)

Suitability: Platform implementations (SAP Business One, Salesforce), data migrations

Predictability: Fixed budget allows for financial planning and ROI calculation

Change Management: Changes outside original scope handled through formal change orders with impact assessment

MANAGED SERVICES ENGAGEMENTS

Model: Ongoing support for platform(s) deployed by Gauri

Scope: Application support, patching, performance monitoring, incremental enhancements

Billing: Monthly recurring fees based on system criticality and support level

Multi-Year Terms: Typically 2-3 year engagement supporting client's business growth

Engagement Lead: Customer Success team with support specialists assigned

Service Levels: P1-P4 response times as defined in Escalation Matrix

HYBRID ENGAGEMENT MODELS

Blended Approach: Combination of fixed and time-and-materials components

Typical Model: Fixed scope for core platform implementation, time-and-materials for integration and customisation

Example: "SAP Business One base implementation fixed scope, integration with legacy systems time-and-materials"

Clarity: Hybrid model clearly documented in SOW with distinct sections and pricing

PLATFORM IMPLEMENTATION SERVICES

SAP BUSINESS ONE IMPLEMENTATIONS

Scope: Complete ERP implementation for mid-market distribution and light-manufacturing businesses

Timeline: 3-month compressed deployment (faster than typical enterprise ERP)

Typical Price Range: £150,000 - £350,000 (varies by complexity)

Included Services:

- Discovery and business process mapping
- System configuration to client requirements
- Data migration from legacy system
- Integration with existing systems (e-commerce, logistics, accounting)
- User training by implementation consultants
- Post-go-live hypercare (30 days)

Optional Services:

- Setu-AI for document automation (invoices, purchase orders)
- Advanced reporting and analytics
- Mobile app customisation for field operations
- Extended hypercare beyond 30 days

Success Metrics: Go-live on schedule, post-launch adoption, reduced manual processes

SAP S/4HANA CLOUD IMPLEMENTATIONS

Scope: Enterprise ERP modernisation for large, complex organisations

Timeline: 6-12 months depending on complexity and organisation size

Typical Price Range: £500,000 - £2,000,000+ (enterprise scale)

Included Services:

- Business process design aligned to SAP best practices
- Current-state assessment and fit-to-standard analysis
- Data migration and cleansing from legacy systems
- Clean-core extensibility design on SAP BTP
- Integration with Salesforce and other platforms
- User training and change management
- Extended hypercare (typically 60-90 days)

Optional Services:

- Advanced demand forecasting and supply chain optimisation
- Setu-AI for document automation across finance and procurement
- Analytics and business intelligence platform
- Managed services contract post-go-live

Success Metrics: Modernised ERP platform, upgrade-proof architecture, business process improvement

SALESFORCE IMPLEMENTATIONS

Scope: CRM platform implementation for sales, service, and customer engagement

Timeline: 3-6 months depending on deployment scope

Typical Price Range: £100,000 - £500,000 (varies significantly by scope)

Sales Cloud: Lead and opportunity management, forecasting, sales automation

Service Cloud: Case management, knowledge management, customer portal

Field Service: Mobile workforce management for service technicians

Agentforce: Autonomous AI agents for routine processes

Included Services:

- Business requirements gathering
- Salesforce configuration and customisation
- Salesforce-SAP integration (if applicable)
- User adoption programme and change management
- Training for different user roles
- Post-go-live adoption support

Optional Services:

- Einstein implementation and AI model tuning
- Agentforce agent design and training
- Advanced reporting and dashboards
- Salesforce ecosystem tool integration (Slack, Microsoft Teams, etc.)
- Managed services contract

Success Metrics: User adoption rates, data quality, business process efficiency

DATA AND AI SERVICES

DATA ENGINEERING AND LAKEHOUSE ARCHITECTURE

Scope: Design and implement governed data foundations for analytics and AI

Timeline: 2-6 months depending on data complexity

Typical Price Range: £80,000 - £300,000

Services:

- Current-state data inventory and assessment
- Cloud data platform selection and sizing
- Lakehouse architecture design
- ETL/ELT pipeline development
- Data quality framework implementation
- Semantic model design
- Access governance configuration
- Training on data platform and governance

Deliverables:

- Lakehouse architecture documentation
- Functioning data pipelines
- Data quality monitoring and alerting
- Semantic model for common metrics
- Access control policies
- Runbooks for operations team

ANALYTICS AND BUSINESS INTELLIGENCE

Scope: Transform governed data into actionable insights for business users

Timeline: 1-3 months (depending on complexity)

Typical Price Range: £40,000 - £150,000

Services:

- Metrics definition and requirements gathering
- BI platform selection and implementation
- Dashboard design for different user roles
- Self-service analytics enablement
- User training and adoption
- Ongoing optimisation

Platform Options:

- Tableau
- Looker
- ThoughtSpot (search-driven)
- Microsoft Power BI
- Custom dashboards built on cloud data platforms

Deliverables:

- Executive dashboards
- Operational dashboards
- Self-service analytics environment
- User training materials
- Governance policies

GENERATIVE AI IMPLEMENTATION (Setu-AI, Einstein, SAP Business AI)

Scope: Implement and tune generative AI capabilities for specific business processes

Timeline: 4-8 weeks (after platform base implementation)

Typical Price Range: £25,000 - £100,000

Services:

- AI use case identification and business case development
- Model training and validation
- Integration with underlying platforms (SAP, Salesforce)
- Governance framework setup
- User training and adoption
- Performance monitoring

Setu-AI Specific:

- Document type identification and ML model training

- Integration pipeline design and testing
- Extraction accuracy validation (typically 95%+ required)
- Continuous learning and model refinement

Einstein / SAP Business AI:

- Configuration of embedded models
- Custom model training for company-specific scenarios
- Workflow integration
- User enablement on new AI-assisted processes

Deliverables:

- Trained and validated models
- Integration pipelines
- Governance documentation
- User training and change management
- Performance dashboards

PREDICTIVE ANALYTICS

Scope: Develop ML models for forecasting and decision support

Timeline: 2-4 months

Typical Price Range: £50,000 - £150,000

Use Cases:

- Demand forecasting
- Churn risk prediction
- Lead scoring
- Inventory optimisation
- Price optimisation

Services:

- Historical data analysis
- Feature engineering
- Model development and validation
- Production deployment
- Retraining pipelines
- Continuous monitoring

INTEGRATION AND MIGRATION SERVICES

SALESFORCE-SAP INTEGRATION

Scope: Design and implement bi-directional data synchronisation and process integration

Timeline: 4-8 weeks (after core platform implementations)

Typical Price Range: £40,000 - £120,000

Integration Patterns:

- Customer master synchronisation (SAP $\leftrightarrow$ Salesforce)
- Order-to-cash integration
- Product and pricing master sync
- Revenue reconciliation
- Real-time vs. batch synchronisation

Tooling:

- MuleSoft (API-based, real-time)
- Talend (ETL, batch or real-time)
- SAP Integration Suite / BTP
- Salesforce Connect (external objects)

Deliverables:

- Integration design documentation
- Operational pipelines
- Monitoring and alerting

- Error handling and reconciliation
- Runbooks for support team

DATA MIGRATION SERVICES

Scope: Moving data from legacy systems to new platforms

Timeline: Varies (2-12 months depending on volume and complexity)

Typical Price Range: £30,000 - £200,000+

Services:

- Legacy system assessment and data inventory
- Data mapping and transformation logic
- Data cleansing and validation rules
- Test data subset migration
- Full data migration execution
- Reconciliation and validation
- Cutover planning and support
- Post-migration monitoring

Risks Managed:

- Data loss
- Data corruption
- Business continuity during cutover
- Data quality issues in target system

TRAINING AND CHANGE MANAGEMENT SERVICES

USER TRAINING PROGRAMMES

Scope: Structured training enabling users to effectively use new platforms

Timeline: 2-8 weeks (typically during implementation)

Typical Price Range: £10,000 - £50,000

Delivery Methods:

- Role-based training (finance, sales, operations)
- Live system training in sandbox environment
- Super-user training for power users
- Documentation and job aids
- Train-the-trainer for client's training team
- Post-go-live reinforcement training

Focus Areas:

- Day-to-day job functions in new system
- Common scenarios and workflows
- Exception handling and escalation paths
- Report generation and data access
- Mobile app usage (if applicable)

CHANGE MANAGEMENT PROGRAMME

Scope: Managing organisational adoption of new platforms and processes

Timeline: 4-8 weeks (pre-launch through post-launch)

Typical Price Range: £15,000 - £60,000

Services:

- Executive sponsorship alignment
- Stakeholder identification and engagement
- Change impact assessment
- Communication plan and campaign
- Resistance identification and mitigation
- User feedback and incorporation
- Post-launch reinforcement

- Adoption metrics tracking

Deliverables:

- Change communications (email, meetings, announcements)
- FAQs and decision guides
- Adoption metrics dashboard
- Issues log and resolution tracking

AI READINESS ENABLEMENT

Scope: Preparing organisations (people and processes) for AI initiatives

Timeline: Ongoing (part of implementation or separate multi-month programme)

Typical Price Range: £20,000 - £80,000

Content:

- AI literacy and education
- Governance and risk framework
- Use case identification workshop
- Responsible AI principles
- Model performance monitoring and ethics
- Cross-functional collaboration model

MANAGED SERVICES OFFERINGS

APPLICATION SUPPORT

Scope: Day-to-day technical support for deployed platforms

Response Times: P1 15 min, P2 1 hour, P3 4 hours, P4 1 business day

Included:

- Incident management and resolution
- Configuration changes and optimisation
- User access and permission management
- Reporting on system performance
- Knowledge base maintenance
- Regular platform updates and patches

Typical Cost: 15-20% of implementation cost annually (varies by system complexity)

ENHANCED SUPPORT

Scope: Application support plus business process optimisation

Includes:

- All standard application support
- Quarterly business reviews
- Process optimisation recommendations
- Data quality monitoring and improvement
- Incremental enhancements and customisation
- Proactive system health monitoring

Typical Cost: 20-25% of implementation cost annually

STRATEGIC PARTNERSHIP

Scope: Deep, ongoing partnership supporting business transformation

Includes:

- All enhanced support services
- Strategic planning and roadmapping
- Emerging technology evaluation
- Digital transformation advisory
- Continuous process improvement
- Investment in latest platform capabilities

Typical Cost: 25-30% of implementation cost annually (varies by engagement depth)

PROFESSIONAL SERVICES RATES

TYPICAL GAURI DAY RATES

Consultant (T&M): £1,000 - £1,500/day

Senior Consultant: £1,500 - £2,000/day

Lead Architect: £2,000 - £2,500/day

Principal Consultant: £2,500 - £3,000/day

Rates vary based on:

- Specialism (SAP, Salesforce, Data & AI)
- Experience and certification level
- Project criticality and risk
- Travel and onsite requirements
- Duration of engagement

FIXED PRICE PROJECTS

Pricing: Varies significantly (£30,000 - £2,000,000+)

Factors Affecting Price:

- Platform and complexity
- Data volume and quality
- Integration requirements
- Organisational size and geography
- Customisation vs. standard configuration
- Timeline and staffing flexibility

ESTIMATION APPROACH

Requirements-Driven: Pricing based on detailed statement of work and requirements

Complexity Scoring: Use complexity matrix to estimate effort and cost

Contingency: 10-15% contingency for typical projects to account for unknowns

Change Control: Changes outside original scope handled through formal change orders
