

Company Profile

GAURI LTD: COMPANY PROFILE AND OVERVIEW

COMPANY IDENTITY AND REGISTRATION

Registered Name: Gauri Ltd
Registration: England and Wales, Company Number 6041427
Headquarters: Lincoln, United Kingdom
Website: www.gauri.com
Founded: 2007
Headcount: 180-220 consultants, engineers, and support staff (illustrative)

MISSION STATEMENT

Make enterprises AI-ready on the platforms they already run — modernising and connecting Salesforce, SAP, and enterprise data estates so that transformation delivers measurable growth rather than isolated pilots that never reach production. Summarised as "AI without the hype, readiness without the risk."

VISION STATEMENT

To be the trusted partner that UK and European enterprises turn to when they want artificial intelligence to deliver real business outcomes by ensuring the platforms, data, and people underneath AI are genuinely ready for it.

CORE VALUE PROPOSITIONS

The company operates on five core values anchored in the tagline "Great value, delivered":

1. CLIENT-CENTRIC FOCUS

Putting client goals at the heart of every SAP and Salesforce solution delivered, rather than a one-size-fits-all template approach. Client testimonials repeatedly highlight named consultants and collaborative, responsive working style.

2. PROVEN EXPERTISE, NOT HYPE

Track record of SAP and Salesforce delivery since 2007 and production AI since 2019. Predates the current wave of generative AI interest. Favours demonstrably working approaches over trend-chasing.

3. READINESS BEFORE RISK

Builds governed data foundations and platform readiness before layering on AI. Ensures transformation is dependable rather than speculative. Board-level positioning: "How do we use AI without betting the business on it?"

4. PARTNERSHIP OVER TRANSACTION

Client testimonials consistently describe Gauri as a collaborative partner who understood project remit and adapted to it. Not a transactional vendor model.

5. AGILITY WITH ACCOUNTABILITY

Agile delivery models that adapt to business needs while still respecting timelines and budgets. Small, accountable project teams rather than large benches.

COMPANY HISTORY AND EVOLUTION

2007: Founded as boutique SAP integrator specializing in enterprise resource planning for mid-market UK companies
2019: Expanded into production machine learning and AI solutions, predating current generative AI wave
2024: Evolved into multi-practice consultancy spanning CRM, ERP, data platforms, and applied AI

GROWTH TRAJECTORY

From: Single-practice SAP integrator
To: Multi-practice enterprise technology consultancy
Serving: Mid-market and enterprise clients primarily in UK and Western Europe
Sectors: Manufacturing, financial services, automotive, retail, healthcare, education, third sector (non-profit)

PARTNER ACCREDITATIONS AND RECOGNITION

- UK Salesforce Summit Partner (highest tier in Salesforce consulting partner programme)
- SAP Implementation Partner with sustained delivery volume and certification depth
- Certified consultants across both Salesforce and SAP ecosystems
- Named case studies across multiple verticals

NAMED CLIENT ROSTER

- Synthomer (global CRM and ERP transformation)
- Groupe Atlantic (Salesforce and SAP integration across UK, ROI, US)
- Micro Tech UK (NHS and private hospital device distribution)
- Roper Rhodes (bathroom products manufacturing and retail)
- Arco (third sector)
- Kestrel Automotive Group (dealer and service group)
- Wentworth Regional College Group (further education)
- Medivance Surgical Supplies (healthcare device distribution)
- Alderton Precision Components (industrial manufacturing)
- Harlow & Vance Home (multi-channel homeware retail)

CORPORATE GOVERNANCE AND COMMITMENT

- Operates under UK private limited company structure
- Non-executive advisory board from manufacturing and financial services
- Published Modern Slavery Statement
- Published Equality, Diversity & Inclusion (EDI) Commitment
- Structured governance culture with internal AI review processes

GEOGRAPHIC PRESENCE

Headquarters: Lincoln, UK

Regional Offices: London (client engagement), Manchester (Data & AI delivery hub)

European Support: On-the-ground consultants in France and Republic of Ireland for client programmes

Delivery Model: Hybrid - regional office based with on-site presence during discovery, cut-over, and hypercare

ORGANISATIONAL STRUCTURE

Executive Leadership: Chief Executive Officer, Chief Technology Officer, Chief Operating Officer

Practice Heads: Salesforce Practice Lead, SAP Practice Lead

Delivery Teams: Organized around small, accountable project teams

Support: Customer Success, Support Tier 1 and Tier 2 specialists

Enablement: Structured training curriculum for consultants and clients

EMPLOYEE-FIRST PHILOSOPHY AND CULTURE

Core belief: Technology transformation only sticks when people are properly supported

Curriculum Alignment: Same AI enablement curriculum used for client teams is used internally for consultant training

Staffing Philosophy: Consultants staffed on work matching and stretching their certification path

Timeline Accountability: Delivery schedules account for hypercare and knowledge transfer, not just go-live

Governance Support: Clear boundaries and support for employees rather than open-ended pressure

Outcomes: Workforce able to speak with confidence and credibility because they have lived the readiness journey they ask clients to undertake

HYBRID WORK CULTURE

- Consultants based from regional office (Lincoln, London, Manchester)
- On-site presence during discovery, cut-over, and hypercare phases
- Remote work during build, configuration, and support between milestones
- Reflects standard UK consultancy model for delivery efficiency

INVESTMENT IN PEOPLE

- Structured enablement curriculum (internal and client-facing)
- Continuous learning culture as core to job, not optional extra
- Certification pathway alignment (Salesforce, SAP, Data & AI)
- Internal AI governance review process
- Knowledge transfer emphasis over transactional project completion

THREE "READINESS" PILLARS (Strategic Framework)

1. READY PLATFORMS: Salesforce Agentforce and Einstein, SAP Business AI and SAP BTP implementation by certified consultants
2. READY DATA: Governed data foundations, lakehouse architectures, semantic models for trustworthy AI reasoning
3. READY PEOPLE: Structured AI enablement programmes for client teams using Gauri's internal training curriculum
