

Gauri — Password, Endpoint, VPN & Security Addendum

Dedicated security retrieval boundary. Treat these records as internal operational policy supplied by the user unless a later authoritative security document supersedes them.

Corpus rule: This file is an **addendum** to the user's existing 12-file ZIP. It is designed to add information not already represented there, or to add authoritative/current versions of facts that supersede illustrative records. Public facts, user-supplied policy facts, and illustrative fallback material are explicitly labelled.

A. Password policy

SEC-001 | Minimum length

Fact: Minimum 14 characters.

Status: USER-SUPPLIED INTERNAL — VERIFY | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-002 | Complexity

Fact: At least one uppercase, one lowercase, one number and one special character.

Status: USER-SUPPLIED INTERNAL — VERIFY | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-003 | Personal/company terms

Fact: Password cannot contain employee name or company name.

Status: USER-SUPPLIED INTERNAL — VERIFY | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-004 | Password history

Fact: Cannot reuse previous 10 passwords.

Status: USER-SUPPLIED INTERNAL — VERIFY | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-005 | Expiration

Fact: Password rotation requirements are referenced but no exact rotation period is supplied.

Status: INCOMPLETE | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-006 | Service accounts

Fact: Exceptions for service accounts are referenced but not defined.

Status: INCOMPLETE | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

B. Failed attempts / lockout / reset

SEC-010 | Lockout trigger

Fact: 5 failed attempts → account locked.

Status: USER-SUPPLIED INTERNAL — VERIFY | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-011 | Lockout duration

Fact: 15-minute lockout duration.

Status: USER-SUPPLIED INTERNAL — VERIFY | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-012 | Repeated lockouts

Fact: Repeated lockouts trigger IT Security investigation.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-013 | Password management

Fact: Password manager, password reset, forgotten-password and temporary-password processes are required capabilities; exact workflow is not supplied.

Status: INCOMPLETE | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

C. Prohibited password practices

SEC-020 | Sharing

Fact: Do not share passwords.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-021 | Paper storage

Fact: Do not write passwords on paper.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-022 | Plain-text storage

Fact: Do not save passwords in plain text.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-023 | Email/chat transmission

Fact: Do not send passwords through email or chat.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

D. Privileged accounts

SEC-030 | Admin credentials

Fact: Admin accounts require separate privileged credentials and stronger authentication.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

SEC-031 | Least privilege

Fact: The supplied engineering standards also require least-privilege access for API calls/database queries and security review of client-data changes.

Status: USER-SUPPLIED INTERNAL / ENGINEERING SOURCE | **Effective/observed:** 2026-08-13

Source: User-provided 41-page merged Gauri PDF; records explicitly marked illustrative/internal are not treated as verified public facts.

E. Laptop / endpoint

EP-001 | Allocation

Fact: All employees receive a company laptop; newly joined employees receive a laptop; higher configurations may be provided by role.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

EP-002 | Physical protection

Fact: Employees are responsible for physical protection and safe transportation.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

EP-003 | Endpoint controls

Fact: Password protection, encryption, screen lock, antivirus/EDR, disk encryption, firewall, automatic updates and USB restrictions are listed.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

EP-004 | Approved software

Fact: Only approved software should be installed; admin privileges are controlled; pirated software is prohibited.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

EP-005 | Remote security

Fact: VPN, secure Wi-Fi, no unauthorised users and privacy screens where necessary are required for remote work.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

F. Loss, theft, damage and exit

EP-010 | Lost/stolen process

Fact: Immediately inform IT + Security → device remotely locked → credentials revoked → security investigation → incident report.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

EP-011 | Damage

Fact: Accidental damage, negligence, repair and replacement are identified as asset-management cases; exact liability rules are not supplied.

Status: INCOMPLETE | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

EP-012 | Exit return

Fact: Laptop, charger/accessories, data backup, device wiping and asset clearance are part of the exit process.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

G. VPN policy

VPN-001 | Eligibility

Fact: Every employee; remote employees, travelling employees, approved contractors and IT administrators are listed as eligible users.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

VPN-002 | System requirement

Fact: All systems are stated to require VPN; remote access is allowed.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

VPN-003 | Authentication

Fact: Corporate username + password + MFA + device compliance.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

VPN-004 | Approved devices

Fact: Company/managed devices with antivirus/EDR and current OS updates.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

VPN-005 | Public Wi-Fi

Fact: Airport, café, hotel and co-working spaces are recognised contexts; the WFH policy separately says no public Wi-Fi for sensitive work.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

VPN-006 | Prohibited use

Fact: Credential sharing, unauthorised devices, bypassing security controls and prohibited personal use are not allowed.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

VPN-007 | Troubleshooting

Fact: Connection failure, MFA failure, expired password and certificate issues are listed; contact IT Helpdesk.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.

VPN-008 | Monitoring

Fact: Login logs, geographic anomalies, multiple failed connections and suspicious sessions are monitored.

Status: USER-SUPPLIED INTERNAL | **Effective/observed:** 2026-08-13

Source: User-provided current/operational data in text_guri(2).txt; treat as company-internal source supplied by user.
